Mathematical methods for economic theory 9 1 First order

When studying differential equations, we denote the value at t of a solution x by $x(t)$. I follow convention and use the notation x_t for the value at t of a solution x of a difference equation.

What is the difference between the difference equation and

There are two types of equations, one is difference equation and the other one is differential equation. The difference equation, which is we get in the calculus of finite differences.

What is the difference between differential equations and

Differential equation involves derivatives of function. Difference equation involves difference of terms in a sequence of numbers. People sometimes construct difference equation to approximate differential equation so that they can write code to solve differential equation numerically. However, this is not the only application of difference equation. Difference equation is very useful in describing discrete problems.

Linear difference equation Wikipedia

In mathematics and in particular dynamical systems, a linear difference equation: ch. 17: ch. 10 or linear recurrence relation equates to a polynomial that is linear in the various iterates of a variable that is, in the values of the elements of a sequence.

Difference Equation CCRMA

Difference Equation The difference equation is a formula for computing an output sample at time based on past and present input samples and past output samples in the time domain. 6.1 We may write the general, causal, LTI difference equation as follows:

Recurrence relation Wikipedia

However, the Ackermann numbers are an example of a recurrence relation that do not map to a

difference equation, much less points on the solution to a differential equation. See time scale calculus for a unification of the theory of difference equations with that of differential equations .
